

OptimizeRx Corporation

Environmental Policy Statement

Our Mission

OptimizeRx Corporation (“OptimizeRx” or “Company” or “we” or “our”) is a digital health company that is focused on bringing life sciences support to patients and providers. We advance affordability and make it easier for patients to stay on therapy. Although our services are digital, we recognize that our operations have an impact on the environment.

Scope

This Environmental Policy (this “Policy”) applies to the Company’s entire business. Our goal is to continually improve our impact on the environment across our business operations, employees, and various contractual partners.

Our Commitments

Environmental Law and Regulation

- We comply with all applicable environmental laws and regulations.

Employees

- We foster awareness of sustainability topics with our employees by emphasizing ways they can work sustainably and further reduce our environmental impact as whole.

Business Operations

- We measure and report the carbon footprint of our offices.
- We monitor our business operations to identify other potential environmental issues (e.g., electronic waste).
- We strive to mitigate our carbon footprint and other activities which we identify as having environmental impacts. For example, we use cloud-based technologies that automatically reduce energy consumption by shifting usage to off-peak hours.
- We use a paperless contracting process.
- We recycle e-waste in an R2-certified facility.
- Most of our employees work remotely, which greatly reduces the negative environmental impacts from commuting.

Transparency

- We regularly report our progress on material environmental topics.
- We will share this policy publicly and make appropriate changes on an ongoing basis.
